Men and women in astrological signs

Men and women are different.
This makes our world challenging and exciting.
A fulfilled relationship and intimacy gives our live
success, aliveness, sexual satisfaction and sweetness.
It gives children more safeness to develop their lives.

Successful and fulfilled relationship demands a knowledge of ourselves.

Unhappy lovelife can lead to sickness and destructive environment.
People dream about prince and princess,
but even don't know what they want or what them really lights up in relationship.

With astrological signs you can take a look to your dreams and true desire.
In this course we will take a look to your star signs like Venus, Mars and your Moon.
The Venus shows your female side, how you show yourself as a woman,
and for men it means which kind of woman you prefer.
Mars talks about the field man likes to take action and
what kind of man we desire as a woman.
As we have all the feminine part and male part in us,
Venus and Mars tell of course also about our rezeptive and active side.
The moon is our childish, tender and emotional vibration which
tones our sensitiveness when it comes to deeper feelings and how to open our intimacy.
And also we will use a coaching-tool to find out
what kind of men or women you are and really want!
